Let's Start with Users

This is the button you get from managing other people that lets you flip Google Accounts

This lets you sync all your stuff across devices and also lets' you easily manage and find things within Google

Chrome lets you sign in in order to sync everything and enable single sign on

This lets you import bookmarks and settings from other browsers

This becomes super important to help you switch between Google Accounts. When you add new people it gives you a button in the top right
